## Bremerhaven – The RTI Experience 2011

**Only 116 days to go and there is no better place in Germany for the RTI World Meeting 2011.**

Werner Maier, RTI convenor & RTD IRO 2009-2011

**Before we start the party, here are some facts about Bremerhaven: stay tuned – the next newsflash will be about the evening events! So ... party on!**

**There is no other town in Germany which is influenced so much by their proximity to the open sea.** Based on their maritime tradition „the world on sea“ opens up new visions and ideas for old and new enterprises. Two aspects of Bremerhavens` versatile port business are one of Europe's` largest container terminals and automotive port handling facilities, featuring a special competence in logistics and transportation industry.

A modern center of the seafood-industry has been established around Germany's largest fishery

port having a tremendous know-how in allocating and handling of seafood resources.

Bremerhaven shipbuilding industry and its marine technology entrepreneurs are amongst the finest in the world developing even the most complex systems and with its ship yards meeting any global standard.

What is more, Bremerhavens fascination generated by its proximity to the sea and its maritime atmosphere has been clearly identified as one of the most important opportunities for a further development of tourism.

Bremerhavens economical structure is based upon a wide-spread variety of research activities. Entrepreneurs and high-tech companies

are supplied by a tailor-made infrastructure.

We are looking forward to see you in August and give you the ultimate Bremerhaven Experience!
